Royal London Cash Plus Fund (Income - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00BMNR1F35
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective To provide a combination of capital growth and income.

Policy The Fund invests in cash, deposits, money market instruments and government bonds with shorter maturities. The Fund may use derivatives, but for efficient portfolio management purposes only. Where relevant, investments will be screened to ensure they meet the Fund's predefined ethical criteria.

Recommendation Investors who seek income or a short-term investment option.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. High quality bonds are those that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

Money market instruments Investments that pay interest, have a short duration and are designed to maintain a stable value.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

The following share classes are available for the Fund: Income M, Accumulation Y, Income Y (G), Income Y, Accumulation Z, Income Z, and Income X. All share classes are subject to a minimum investment. If this is an income share class, any net income will be paid out to you. If this is an accumulation share class, any net income will be reinvested in the Fund.

Risk and reward profile

Lower potential risk/reward

Higher potential risk/reward

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The Fund is ranked in risk category 1 because its unit price has shown a very low level of volatility historically. As an investment, money market instruments are typically less volatile than bonds and shares. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Concentration Risk Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

Counterparty Risk Market counterparties could become unable to make interest payments or repay debt. As such the value of the Fund will fall in the event of a counterparty default. In general investments that pay a higher level of income usually reflect a lower counterparty credit rating because of the increased risk of default.

Charges

The charges you pay as an investor in the Fund go to cover fund operating costs. These charges reduce the performance of your investment.

One-off charges taken before or after you invest:

Entry charge 0.00%

Exit charge 0.00%

Charges taken from the fund over a year:

Ongoing charge 0.15%

Charges taken from the fund under specific conditions:

Performance fee none

There is no entry or exit charges attached to this share class. Ongoing charges figure is based on expenses for the year ending 30 April 2017. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of the investment.

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)
