

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London Sterling Extra Yield Bond Fund (Income - Class A Shares)

A sub-fund of Royal London Asset Management Bond Funds plc ISIN: IE0032571485

Objectives and investment policy

Objective To achieve a higher income that, over the long term, is 1.25 times greater than the income of the FTSE Actuaries British Government 15 Year Index.

Policy The Fund invests in a range of bonds including investment grade bonds (those of higher credit quality) and unrated bonds. The Fund also invests in sub-investment grade bonds (lower credit quality) which pay a higher rate of interest. At least 75% of the Fund's investments will be in sterling denominated securities. The Fund may use financial derivatives, but for efficient portfolio management purposes only.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Bonds Securities that represent an obligation to repay a debt, with interest. High quality bonds are those that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

Derivative A financial instrument whose price is dependent upon or derived from one or more underlying asset.

Efficient Portfolio Management An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

You can buy and sell your shares on each working day in Ireland, except public holidays, at 5.00pm (Irish time) if you tell us before 5.00pm (Irish time) that you want to do so. Instructions received after 5.00pm (Irish time) will be processed at 5.00pm (Irish time) on the following working day.

The following share classes are available for the Fund: Income A, Income B, Income Y and Income Z. All share classes are subject to a minimum investment. If this is an income share class, any net income will be paid out to you. If this is an accumulation share class, any net income will be reinvested in the Fund.

Risk and reward profile

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The Fund is ranked in risk category 4 because its unit price has shown a medium level of volatility historically. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Credit Risk Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

Concentration Risk Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

Interest Rate Risk Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

For more about fund risks, see the risk factors section in the full Prospectus ([http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance – Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))

Charges

The charges you pay as an investor in the Fund go to cover fund operating costs. These charges reduce the performance of your investment.

One-off charges taken before or after you invest:

Entry charge 0.00%

Exit charge 0.00%

Charges taken from the fund over a year:

Ongoing charge 0.83%

Charges taken from the fund under specific conditions:

Performance fee none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

For the entry and exit charges, if you are not eligible for this share class you will pay more than the amounts shown. Consult your financial adviser.

The ongoing charges figure is based on an estimate as this is a more accurate indication of the fees applicable. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of the investment.

For more about charges, see the expenses section in the full Prospectus and supplement ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance – Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))

Past performance

The graph shows fund performance over the past 10 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund and share class were launched on 11 April 2003.
